

Certified Healthcare Simulation Educator Examination Preparation References

The SSH Certification Committee has put together this list of references for the purpose of aiding the candidate in preparation for the examination. This reference list is a collection of articles related to simulation, education, and research that should help the candidate review information. Further, many of the articles listed were used as source material for the questions on the examination.

This list is targeted towards helping the candidate prepare for the examination. It is not to be considered a comprehensive list of the top list of articles in simulation. Rather, the list should be used as a tool to help prepare for the examination.

NOTE: The candidate need not read each of these items, nor is this expected. The list is made up of articles from which the candidate can select what is needed to gain knowledge in areas where knowledge may be lacking, or to allow the candidate to refresh knowledge.
